★★★★★ Version : 4.7.3 

Release Date : 06-03-2017

[Install](#) Overview Features Screenshots Demo Ratings Reviews Import

WordPress is web software you can use to create a beautiful website or blog. We like to say that WordPress is the easiest way to start a website. The core software is free, there are thousands of themes and plugins available, and when you're ready for more, you can turn your site into almost anything.

Over 60 million people have chosen WordPress to power the place on the web they call "home". We'd love you to join the family.

WordPress is an [Open Source](#) project, which means there are hundreds of people all over the world working on it. (More than most commercial platforms.) It also means you are free to use it for anything from your recipe site to a Fortune 500 web site without paying anyone a license fee.

Administrative URL : <https://www.wordpress-fundamentals.com/wp-admin/>

We hope the installation process was easy.

NOTE: Softaculous is just an automatic software installer and does not provide individual software packages. Please visit the software vendor's web site for more information.

Regards,
Softaculous Auto Installer
